Best Practices

Key messages:

- Focus on the right to be digital through informal education.
- Overreliance to charity organisations and ideal organisations.
- Less attentions placed on didactical principles – educational considerations.
- Some advocacy actions and some research efforts visible.

Now, in groups ...

Discuss the following points for about 30 minutes

- What are the implications of human and digital rights in your professional practice?
- What are the implications of human and digital rights in your private life (relatives, parents)?
- Is there any specific area that you identify as worth discussing from a rights-based approach? (e.g., privacy, the right to choice, education)

Thank you for your attention!
